Product Description

Z-Spray Max

When you're ready to take your application productivity to an entirely new level, the all-new Z-Spray Max is ready to deliver. With a massive 250-pound hopper and 60-gallon tank capacity (two 30-gallon tanks), Z-Spray Max gives you the ability to simultaneously apply liquid and granular materials with unmatched speed and efficiency. This makes it ideal for a wide range of jobs, from mid-size residences to the largest commercial and municipal accounts.

The new corrosion-resistant stainless-steel chassis is designed for a lower center of gravity to enhance stability and maneuverability in any conditions, regardless of the materials on-board. The new bi-directional spray boom pivots both forward and back when impacted, so the boom is much less likely to be damaged. The new tank design drains more completely, so less material is left over in the tank, and a tools-free tank drain eases draining the tank. The patented flip-open hopper eases hopper cleaning and makes for access to the engine for service.

Choose 2ft, 6ft, 8ft, or 10ft spray widths, and up to 25ft spread widths for precise application and maximum productivity on any property. A contoured operator pad and isolation mount-equipped operator platform provide all-day operator comfort, while logical, easy to reach controls make it an easy machine to get to know.

We offer a wide range of accessories for Z-Spray Max, including 7-gallon ISO and Auxiliary tanks, a 30-gallon auxiliary tank, 2-gallon foam marker, vibratory hopper motor, LED light kit and more.
