Product Description

Z-Spray Mid ZSX4640

The all-new Z-Spray Mid 46-inch zero-turn stand-on spreader sprayer strikes the perfect middle ground of maneuverability and productivity for turf care professionals. At 46-inches, it's narrow enough to fit into gated communities, but with a 250 lb. hopper and 40-gallon tank capacity, it can easily tackle larger urban and municipal jobs.

An isolated operator platform and contoured operator pad work with logical, easy to use controls to make Z-Spray Mid an easy machine to operate productively all day, all season. Choose from 2ft, 4ft, 6ft or 8ft spray patterns, and spread widths of up to 25-feet, with the ability to simultaneously apply granular and liquid materials simultaneously at up to 8 mph. A 75-foot hose reel provides extended access for spraying tight spaces.

The new low center of gravity design places the heaviest components low in the corrosion resistant stainless-steel frame. The new bi-directional spray boom pivots both forward and back when impacted, so the boom is much less likely to be damaged. The new tank design drains more completely, so less material is left over in the tank, and a tools-free tank drain eases draining the tank. When combined with our patented locking front caster wheels and wide, 24-inch drive tires, the Z-Spray Mid is stable, maneuverable, and easy to handle on almost any turf.

We offer a wide range of accessories to customize the Z-Spray Mid to your specific needs. Available accessories include a 2-gallon foam marker, 30-gallon auxiliary tank, vibratory hopper motor, LED light kit, 7-gallon ISO tank, 7-gallon auxiliary tank and more.
