Product Description

Z-Spray Lean-to-Steer ZSL3620

Z Turf Equipment presents the innovative and compact Z-Spray LTS Stand-On Spreader Sprayer. The LTS spreader sprayer will take your application program to the next level, boosting productivity and providing unmatched ease of operation. The Z-Spray LTS spreader sprayer offers unmatched performance for its size and maneuverability due to our advanced lean-to-steer technology. Have confidence in the Z-Spray LTS and its spray system to endure season after season. Durable ceramic air induction nozzles provide low drift application even in windy conditions. Our high-grade corrosive-resistant stainless steel chassis further increases the longevity of your turf equipment investment. You can also count on the 9.5 HP Kohler engine to keep you moving at a ground speed up to 5.5 MPH.

Spread and spray widths are easy to adjust on the Z-Spray LTS to apply liquid and granular materials precisely. Choose between a narrow spray of up to 5ft or a wide spray of up to 11ft. The spray system features nozzles that can shut off immediately, giving you the control to apply the correct chemicals to the turf. With a 1.59-gallon fuel capacity and a 20-gallon tank for materials, the LTS keeps you riding longer in-between fill-ups. This nimble piece of turf equipment presents a gate width of just 36", allowing landscape professionals and do-it-yourselfers to tackle any project, big or small.

For added efficiency, consider adding an array of accessories for your spreader sprayer turf equipment, including a 15- or 30-foot hose and tray, anti-siphon assembly, multi-purpose bag, spray wand, hopper screen, and an assortment of colored spray nozzles.
