Product Description

Z-Aerate 30" Stand-On Aerator - ZA4830

Innovation in aerating technology enables the mid-size Z-Aerate 24-inch aerator and Z-Aerate 30-inch aerator to maneuver around trees, flowerbeds, and other landscaping while delivering maximum efficiency and productivity. The Z-Aerate 24 and 30 stand-on aerators utilize intuitive controls and offer zero-turn maneuverability, precise control, and fatigue-reducing ergonomics. Purchase with confidence in the high-quality parts that comprise our stand-on aerators, including commercial-grade engines and durable, self-cleaning tines. Our 24-inch stand-on aerator model equips a 14 HP Kohler engine and 36 coring tines, working at speeds of up to 6.8 MPH. The 30-inch stand-on aerator model puts a 15 HP Kawasaki engine to work with 48 coring tines, reaching a top ground speed of 7 MPH.

One of the most important specifications of these two models is the exception core quality. These stand-on aerators feature heavy-duty tines and pair them with an integrated hydraulic down-pressure to pull plugs with a core depth of up to five inches. While the 24-inch model is equipped with 1.85-gallon fuel capacity, the 30-inch feeds its Kawasaki engine with a 5-gallon tank, producing little downtime and maximizing productivity.
