Product Description

Gravely OVIS RC 40" Briggs & Stratton Remote Control Mower

Built like a tank and equipped with an endless appetite, the Gravely Ovis 40 RC lets you mow where traditional ride-on mowers shouldn't - or even couldn't. Its low center of gravity delivers high expectations which allows its superior traction and track design while still providing the ground clearance needed.

Thanks to its powerful flail-style mowing deck, it chews through any type of tall, overgrown grass - even thick stalks. This is the best way to mow a high, overgrown, slippery incline

Features may include:

Flail-Style Cutting System - The Ovis 40 RC offers an impressive cutting capability of up to 40 inches (100 cm) across all varieties of grass and brush, delivering the proficient cutting performance that's anticipated from a flail-style mower

Hillside Mowing - The heavy-duty track system coupled with its flail-style mowing design enhance weight distribution, which enables safe mowing on slopes up to 55 degrees (crosswise to slope).

Remote-Controlled Mowing - Ensure operator safety in areas requiring maintenance using our advanced remote control technology, boasting an impressive range of nearly 985 feet. Our RC Remote system offers the added benefit of unrestricted use at each location, thanks to its seamless transmitter and remote pairing, allowing for limitless remotes per location.

Best Use

- **Steep Slope Land Management** – Ideal for mowing hillsides and hazardous terrain where operator safety is critical.
- **Overgrown Vegetation Clearing** – Built for heavy brush, tall grass, and unmanaged property maintenance.
- **Commercial Land Clearing Operations** – Perfect for contractors handling difficult and unsafe mowing environments.
- **Remote Safety-Critical Work Zones** – Designed for use in areas where traditional ride-on mowers cannot operate safely with mower maintenance tips supporting long-term equipment reliability.

Remote-Control Flail Mower for Extreme Terrain and Safety-First Operation

The Gravely OVIS RC 40" Briggs & Stratton Remote Control Mower delivers powerful remote-operated mowing performance with its 40-inch flail cutting system, Vanguard® 23 HP engine, and heavy-duty track drive design. Built for extreme slopes and overgrown terrain, it provides safe, efficient cutting without requiring an onboard operator. This [reliable remote-control mower](#) is designed for professionals who need maximum safety, control, and performance in hazardous mowing conditions.
