Product Description

RC EXTREME SLOPE MOWER

Hit the slopes with the all new Scag® RC Extreme Slope™ Mower. This remote-controlled true full hybrid powered machine removes the operator from unsafe situations on extreme slopes and other challenging areas. Machine comes fully equipped with standard packed features that ensures unmatched performance and productivity. No other machine in its class can come close, and has the competition running wild!

The Scag RC Extreme Mower is the product of a years-long collaboration between Scag Power Equipment and its sister company, [Metalcraft Automation Group](#), a provider of game-changing automation solutions for a variety of industries.

See below for all of the killer standard packed features!

HYBRID POWER

Gas / Electric

9kWh total battery power. A 7kW alternator is powered by a 37hp Vanguard Big Block EFI/ ETC engine, which only runs when needed to recharge the batteries. The Oil Guard system enhances engine protection on slopes and maximizes engine oil change intervals to save you time and money. The all electric drive system and deck motors delivers dependable power via 9kWH battery power - not the engine. Electric drive system provides superior remote controlled drivability compared to hydraulic. Ultimately this true full hybrid system provides all-day power with superior drivability performance, increased fuel economy with lower emissions reducing overall running costs.
